Empirical Caveat

Data

- YouGov
 - $n = 5000$
 - Matched sampling; comparisons below.
- Have I Been Pwned (HIBP):
 - Clearinghouse of information about data breaches
 - July 2018 catalogue: 293 breaches covering 278 unique domains
 - Information about 5,235,843,322 breached accounts
- Query HIBP with the email ID on the file.

Empirical Caveat

- Most breaches are never discovered

Data

- YouGov
 - $n = 5000$
 - Matched sampling; comparisons below.
- Have I Been Pwned (HIBP):
 - Clearinghouse of information about data breaches
 - July 2018 catalogue: 293 breaches covering 278 unique domains
 - Information about 5,235,843,322 breached accounts
- Query HIBP with the email ID on the file.

Empirical Caveat

- Most breaches are never discovered
- We can only estimate the *lower bound*.

The horror! The horror!

The horror! The horror!

- 14951 breaches are associated with the 5000 emails on file.

The horror! The horror!

- 14951 breaches are associated with the 5000 emails on file.
- Or on average, there are 2.99 recorded exposures per person. The median is 3.

The horror! The horror!

- 14951 breaches are associated with the 5000 emails on file.
- Or on average, there are 2.99 recorded exposures per person. The median is 3.
- And at least 82.84% of sampled adults have at least one recorded exposure.

The horror! The horror!

- 14951 breaches are associated with the 5000 emails on file.
- Or on average, there are 2.99 recorded exposures per person. The median is 3.
- And at least 82.84% of sampled adults have at least one recorded exposure.

who is pwned?

Upshot

Upshot

- at least 82.84% of sampled adults have at least one recorded exposure

Upshot

- at least 82.84% of sampled adults have at least one recorded exposure
- online-service use is a possible explanation, not measured here

Upshot

- at least 82.84% of sampled adults have at least one recorded exposure
- online-service use is a possible explanation, not measured here
- exposures are concentrated in a few sources

thank you!
